The story behind Global Stone

our story

Global Stone is the Leading importer of Mosaic and Stone Cladding products and is a major supplier to some of the largest distributors throughout Southern Africa. Originally founded in 2005, starting with a limited range of quality Listelli's, Global Stone's product portfolio has grown into one of the largest offerings of fine mosaics, listelli and cladding products. We are an independent, owner-managed company that aspires to provide its clients with a superior personalised service. With numerous years of dedication in related industries, the founders had the vision to become the leading purveyor of decorative mosaic and cladding products in Southern Africa.

Our Mission is to provide the most reliable inventory and service in the industry at the most competitive prices possible. We set ourselves apart from our competitors by offering our customers total exclusivity on ranges selected when necessary. Global Stone is founded on our dedication to our customers and our products and prides itself in doing business in an ethical and transparent manner.

INSTALLATION GUIDES & TECHNICAL INFORMATION

GLOBAL STONE

Purveyors of fine Mosaics

Tools Required

- Mosaic Adhesive - see packet for coverage.
- Grout – A colour should be selected that best suits the colour of the mosaic.
  Mosaic Trowel – this is generally the smallest notched trowel available. This is used to en sure that not too much adhesive is applied to the substrate Rubber Grout Float – this is used to apply the grout to the surface without scratching the mosaic.
- Sponge – used to clean off excess grout from the mosaic.
- Dry Cloth/Towel – to buff the mosaic post grouting.
- Water – to clean the sponge inbetween wiping.

Method

Step 1: Ensure that the substrate is prepared for installation (clean, dry and free from dust & debris).

Step 2: Mix your mosaic adhesive. Use the directions provided on the packet from the manufacturer. You should always use a mosaic adhesive. Do not use a porcelain adhesive unless tiling a porcelain mosaic. Only use mosaics adhesive with 4 or 6mm glass mosaics. Key Coat is not recommended when tiling a 4mm or 6mm glass product as this puts too much pressure on the glass whilst curing and can cause cracking.

Step 3: Once mixed – apply the adhesive to the substrate using a Mosaic trowel.

Step 4: Using the flat side of the trowel, smooth out all of the ridges in order to achieve a consistent and even 2-3mm thick coverage.

Step 5: Apply your mosaic tiles to the freshly troweled adhesive. Remember to do this MESH SIDE DOWN.

Step 6: Using your rubber grout float (or an equivalent), gently press the tile into the adhesive and flatten sheets to each other to ensure contact and a smooth evenly pressed mosaic. Try not to push mosaics too deeply into the adhesive as this can cause the adhesive to ooze between the tiles.

Step 7: Give the adhesive time to set – ensure this is done in line with the manufacturer's guidelines. Please note that even if the adhesive packet says you can lay and grout at the same time, it is NOT recommended to do so as some mosaics are made

of porous material which can absorb the moisture from the adhesive before the substrate can. This will discolour the mosaic or cause rust marks on metallic glass.

Step 8: Clean any excess adhesive with a damp sponge and wipe away any haze that may have remained.

Step 9: After 24 hours, mix your grout (again in line with the manufacturer's guidelines), Apply the grout to the tile openings between the tiles. Work in sections – removing excess grout with a damp sponge as you go. It is best to grout approximately 1 sqm at a time, cleaning before continuing with the next sqm.

Step 10: Polish off any remaining haze with a dry cloth or towel.

Follow these steps and there is no reason why your mosaic installation should be anything other than a success.

OUR PREMISES

GLOBAL STONE
Purveyors of fine Mosaics

Double display stand

Single display stand

Product displays

Over the years, Global Stone's product portfolio have expanded to where we now offer our clients display options to portray our beutiful product ranges in a neat way which is easy accessible and makes it convenietnt to showcase our latest ranges to their clients.

We currenlty have 3 options to choose from, which include a double pillar display stand which holds up to 24 product display boards/panels as well as a single pillar display stand holding up to 16 product display boards/panels. Both of these are mounted on 4 durable wheels which make them easy topush around. We also offer a counter top display stand which holds 10 product display boards/ panels.

Counter top display stand

Meet our team

"Allow your passion to become your purpose, and one day it will become your profession."

– Gabriel Bernstein

At Global Stone, we have been creating, designing and advancing the development of mosaics and tile décor since 2005. With that very passion, we strive to provide our loyal customers with superior service, reliable inventory and the latest offering in world-class designs.
